**Fabrication Method:**

Extruded

**Min. Tensile Strength (psi):**

13000 pounds per square inch

**Width:**

0.750 inches

**Thickness:**

0.500 inches

**Material Transparency:**

Translucent

**Special Features:**

Cream, light color, heat resistant, wear resistant and weather resistant

**Material:**

Plastic, polyamide, polyhexamethylene adipamide, I-p-410

**Material:**

Plastic polyhexamethylene adipamide

**Material Specification:**

L-p-410 federal specification 1st material response

**Specification Or Standard:**

Polyhexamethylene amide, with or without filler composition composition

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A26800
