Fabrication Method:

Extruded

Min. Tensile Strength (psi):

13000 pounds per square inch

Width:

0.750 inches

Thickness:

0.500 inches

Material Transparency:

Translucent

Special Features:

Cream, light color, heat resistant, wear resistant and weather resistant

Material:

Plastic, polyamide, polyhexamethylene adipamide, I-p-410

Material:

Plastic polyhexamethylene adipamide

Material Specification:

L-p-410 federal specification 1st material response

Specification Or Standard:

Polyhexamethylene amide, with or without filler composition composition

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
