Width:

2.000 inches

Thickness:

0.500 inches

Length:

10.200 inches

End Application:

Nsn 2915-01-310-2141; fuel control, afterburner, turbine; which is part of 100-pw0-229 engine

Special Features:

The plate is used during assembly and disassembly to protect the mounting surface of the main housing (p/n801038) when attached to cart (p/n gs22789-1) or the power arm adapter (p/n gs21612-1)

Material:

Plastic, laminated paper base

Material:

Plastic and paper

Supplementary Features:

The protector plate is a rectangular, laminated plastic, 0.5 inch thick, plate; all four (4) corners are chamfered and six (6) through holes exist; four (4) mounting holes grouped in their center are clearance for four (4) bolts from the cart or the power arm adapter; two (2) holes on either end allow clearance for pins protruding from the fuel control mounting face

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
