Min. Tensile Strength (psi):

20 pounds per square inch

Width:

24.000 inches

Tempurature Rating:

-45.0 degrees fahrenheit and 250.0 degrees fahrenheit

Thickness:

0.750 inches

Length:

54.000 inches

Special Features:

2 cu. Ft density, 75 pore per linear in., flame resistant, 2 lbs per in. Tear strength

Color:

Charcoal both sides

Material:

Plastic, polyurethane foam

Material:

Plastic polyurethane

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
