Fabrication Method:

Extruded

Min. Tensile Strength (psi):

13000 pounds per square inch

Width:

36.000 inches

Thickness:

0.400 inches

Length:

48.000 inches

Material Transparency:

Opaque

Special Features:

Heat, wear and weather resistant

Color:

Black both sides

Material:

Plastic, polyamide, polyhexamethylene adipamide, I-p-410

Material:

Plastic polyhexamethylene adipamide

Material Specification:

L-p-410 federal specification 1st material response

Specification Or Standard:

Polyhexamethylene adipamide 6/6 black with or without fillers composition composition

Departure From Cited Designator:

As modified by color

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
