Fabrication Method:

Extruded

Min. Tensile Strength (psi):

12000 pounds per square inch

Width:

1.800 inches

Thickness:

0.032 inches

Length:

3.600 inches

Material Transparency:

Opaque

Material:

Plastic, polyamide, polyhexamethylene adipamide, I-p-410

Material:

Plastic polyhexamethylene adipamide

Material Specification:

L-p-410 federal specification 1st material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
