Min. Tensile Strength (psi):

Not rated

Tempurature Rating:

Not rated

Overall Width:

0.640 inches

Length:

Between 120.000 inches and 144.000 inches

Environmental Protection:

Weather resistant

Physical Form:

Solid

Outside Radius:

0.180 inches

First Slot/groove Width:

0.250 inches

Cross Sectional Shape:

C333

Special Features:

Aluminum core reinforcement

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A547d0
