Fabrication Method:

Cellular, exploded

Min. Tensile Strength (psi):

10 pounds per square inch

Width:

44.000 inches

Temperature Rating:

-25.0 degrees fahrenheit and 160.0 degrees fahrenheit

Thickness:

12.000 inches

Length:

110.000 inches

End Application:

P-3 orion fuel tanks

Special Features:

Mil-prf-87260, class 2, grade 1c performance spec

Supplementary Features:

Explosion suppression, inherently electrostatically conductive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A26800

Mil-std (military Standard):

Mil-prf-87260 spec.
