Cross Sectional Shape:

Circular

Fabrication Method:

Laminated

Length:

0.3 millimeters

Surface Condition:

Smooth top

Cross Section Outside Diameter:

12.5 millimeters

Strengthening Feature Material:

Plastic, epoxy

Strengthening Feature:

Base

End Application:

5820-01-444-1219

Product Name:

Plastic sheet

Special Features:

Item is coated w/pressure sensitive adhesive

Color:

White one side

Material:

Glass fabric and plastic, epoxy resin

Material:

Glass and plastic epoxy

Specification Data:

81349-mil-i-24768 government specification and 81349-mil-p-19834 government specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A26800
