**Min. Tensile Strength (psi):**

6000 pounds per square inch and 15300 pounds per square inch

**Width:**

2.000 inches

**Thickness:**

0.375 inches

**Length:**

48.000 inches

**Flexural Strength:**

15400 pounds per square inch and 19700 pounds per square inch

**Product Name:**

Garolite strip

**Special Features:**

density lbs./cu. In. 0.047-0.052; impact strength, psi: 0.8-1.25; compression strength, psi: 22600-36000; dielectric strength, volts/mil: 140-625; water absorption %: 0.47-2

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A26800
