Min. Tensile Strength (psi):

6000 pounds per square inch and 15300 pounds per square inch

Width:

2.000 inches

Thickness:

0.375 inches

Length:

48.000 inches

Flexural Strength:

15400 pounds per square inch and 19700 pounds per square inch

Product Name:

Garolite strip

Special Features:

density lbs./cu. In. 0.047-0.052; impact strength, psi: 0.8-1.25; compression strength, psi: 22600-36000; dielectric strength, volts/mil: 140-625; water absorption %: 0.47-2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
