Refractory Magnesite - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/9350-00-153-6810

Unit Package Type:
Bag
Application Type:
Wet
Content Within Each Unit Package:
100 lb
Component Material:
Caustic, alkali and alumina and calcium oxide and iron oxide and magnesium oxide and silica
Setting Type:
Air
Maximum Tempurature For Which Designed:
2900.0 degrees fahrenheit
Special Features:
Dry form
Shelf Life:
N/a
Unit Of Measure:

Demilitarization:
No
Fiig:
T347-b
