Cross Sectional Shape:

Arch shape, hollow core

Nonmetallic Hardness Rating:

40.0 shore durometer a

Min. Tensile Strength (psi):

1200 pounds per square inch

Overall Height:

1.100 inches

Overall Width:

1.200 inches

Length:

2.600 inches

Environmental Protection:

Oil resistant

Inside Radius:

0.410 inches

Physical Form:

Solid

Outside Radius:

0.550 inches

Material:

Rubber synthetic

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A547d0
