**Unable To Decode:**

Unable to decode and unable to decode

**Min. Tensile Strength (psi):**

1200 pounds per square inch

**Tempurature Rating:**

-94.0 degrees fahrenheit and 400.0 degrees fahrenheit

**Overall Height:**

0.620 inches

**Overall Width:**

1.370 inches

**Length:**

144.000 inches

**Environmental Protection:**

Flex resistant and tear

**Inside Radius:**

0.125 inches

**Outside Radius:**

0.185 inches

**First/top Flange Thickness:**

0.060 inches

**Cross Sectional Shape:**

C183

**Special Features:**

Color, black

**Reference Number Differentiating Characteristics:**

As differentiated by length and material

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A547d0
