Unable To Decode:

Unable to decode and unable to decode

Min. Tensile Strength (psi):

1000 pounds per square inch

Tempurature Rating:

-103.0 degrees fahrenheit and 401.0 degrees fahrenheit

Overall Height:

0.220 inches

Overall Width:

0.510 inches

Length:

Between 96.000 inches and 120.000 inches

Environmental Protection:

Oil resistant and tear and low temperature and heat, dry

Cross Sectional Shape:

C147

Special Features:

Color, gray

Reference Number Differentiating Characteristics:

As differentiated by the length

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A547d0
