Overall Length:

58.000 inches

Overall Height:

12.000 inches

Overall Width:

34.500 inches

End Application:

Containment corporation spill containment systems contain-it jr

Mounting Configuration:

Tie-down grommets around bottom perimeter at 1 ft centers for cinch closure

Special Features:

5 plies of high density polyethylene and nylon yarn laminate; reinforcement is 2 nonwoven grids of high strength nylon cord diamond patterned to provide a uniform loading resistance of no less than 1380 pounds per yard in all directions; nylon reinforcing yarn is suspended in a permanently flexible media to allow fiber slippage; uv stabilized, cold-crack resistant and waterproof to withstand extended exposure to adverse weather; chemical resistant and low permeability to provide , continuous protection; flexible and lightweight for handling ease

Material:

Plastic polyethylene

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T23700
