Overall Length:

49.000 inches

Overall Height:

45.000 inches

Overall Width:

49.000 inches

End Application:

Containment corporation spill containment systems contain-a-tote

Mounting Configuration:

Tie-down grommets around the bottom perimeter at 1 ft centers

Special Features:

With protected clear pouch for recording contents identification without lifting cover; 5-plys high density polyethylene and nylon yard laminate; reinforced with 2 non-woven grids of high strength diamond patterned nylon cord suspended in a permanently flexible media to allow fiber slippage which provides a uniform loading resistance of no less than 1380 pounds per yard in all directions; uv stabilized, cold-crack resistant and waterproof to withstand extended exposure to adverse weather; chemical resistance with low permeability to provide , continuous protection; flexible and lightweight for handling ease

Material:

Plastic polyethylene

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T23700
