Unable To Decode:

Unable to decode and unable to decode

Min. Tensile Strength (psi):

900 pounds per square inch

Tempurature Rating:

-40.0 degrees fahrenheit and 212.0 degrees fahrenheit

Overall Width:

1.172 inches

Length:

144.000 inches

Environmental Protection:

Weather resistant

Inside Radius:

0.172 inches

End Application:

Support equipment, c-130

Outside Radius:

0.203 inches

First/top Flange Thickness:

0.031 inches

Cross Sectional Shape:

C254

Special Features:

Bulb extruded elastic

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A547d0
