Plastic Protective Tape - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/9390-01-482-8030

Material Transparency:
Translucent
Width:
1.250 inches
Tempurature Rating:
160.0 degrees celsius
Nominalthickness:
14.0 millimeters
Adhesive Location:
One side
Special Features:
Vprotects against heavy erosion, abrasion and chafing, fluids and minor impact; used in aerospace, transportation, construction, marine
and general industrial applications; 12 mo shelf life; 1.6 kg tear strength; 85 shore hardness
Color:
Colorless
Material:
Plastic polyurethane basic
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A14300
