Material Transparency:

Translucent

Width:

1.250 inches

Temperature Rating:

160.0 degrees celsius

Nominal thickness:

14.0 millimeters

Adhesive Location:

One side

Special Features:

Vprotects against heavy erosion, abrasion and chafing, fluids and minor impact; used in aerospace, transportation, construction, marine and general industrial applications; 12 mo shelf life; 1.6 kg tear strength; 85 shore hardness

Color:

Colorless

Material:

Plastic polyurethane basic

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A14300
