Overall Width: 0.775 inches Length: Between 120.000 inches and 144.000 inches Environmental Protection: Flex resistant and tear Inside Radius:
0.775 inches Length: Between 120.000 inches and 144.000 inches Environmental Protection: Flex resistant and tear Inside Radius:
Length: Between 120.000 inches and 144.000 inches Environmental Protection: Flex resistant and tear Inside Radius:
Between 120.000 inches and 144.000 inches Environmental Protection: Flex resistant and tear Inside Radius:
Environmental Protection: Flex resistant and tear Inside Radius:
Flex resistant and tear Inside Radius:
Inside Radius:
0.1075 inches
End Application:
F/a-18e/f hornet aircraft
First Slot/groove Depth:
0.400 inches
Outside Radius:
0.1875 inches
First Slot/groove Width:
0.050 inches
Cross Sectional Shape:
C81
Special Features:
Matt: silicone rubber, zz-r-765, class 3, grade 50
Unable To Decode:
Unable to decode and unable to decode and unable to decode
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
Demilitarization:
