Nonmetallic Hardness Rating:

89.0 shore durometer d

Min. Tensile Strength (psi):

11200 pounds per square inch

Tempurature Rating:

504.0 degrees fahrenheit

Diameter:

0.344 inches

Environmental Protection:

High temperature and wear resistant and weather resistant

Special Features:

Natural cream color or as specified; basic nylon 6/6

Material:

Plastic, polyamide, polyhexamethylene adipamide, l-p-410

Material:

Plastic polyhexamethylene adipamide

Material Specification:

L-p-410 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A14500
