Fabrication Method:

Hot rolled

Length:

12.000 feet

Cross-sectional Thickness:

1.0000 inches

Cross-sectional Width:

1.500 inches

Basic Shape Style:

Flat

Weight Per Unit Measure:

5.100 pounds per linear foot

Heat Treatment:

Intermediate temper

Material:

Steel, astm a582, type 416, and cond t

Material:

Steel, astm a582, type 416, and cond t

Surface Condition:

Pickled

Specification Or Standard:

416 type and t condition

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A13100
