Fabrication Method:
Hot rolled
Length:
12.000 feet
Cross-sectional Thickness:
0.1250 inches
Cross-sectional Width:
1.125 inches
Basic Shape Style:
Flat
Weight Per Unit Measure:
0.480 pounds per linear foot
Heat Treatment:
Intermediate temper
Material:
Steel, astm a582, type 416
Material:
Steel, astm a582, type 416
Surface Condition:
Pickled
Specification Or Standard:
Composition 416 and intermediate temper
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A13100
