Fabrication Method:
Hot rolled
Length:
12.000 feet
Cross-sectional Thickness:
0.2500 inches
Cross-sectional Width:
1.125 inches
Basic Shape Style:
Flat
Weight Per Unit Measure:
0.957 pounds per linear foot
Heat Treatment:
Intermediate temper
Material:
Steel, astm a582, type 416, and cond t
Material:
Steel, astm a582, type 416, and cond t
Surface Condition:
Pickled
Specification Or Standard:
416 type and t condition
Shelf Life:
N/a
Unit Of Measure:
-
Demilitarization:
No
Fiig:
A13100
