Fabrication Method:

Extruded

Length:

73.185 inches

Cross-sectional Thickness:

1.2500 inches

Cross-sectional Width:

2.130 inches

End Application:

2320-01-354-3384

Basic Shape Style:

Flat

Special Features:

Both ends are beveled 15 degrees through hollow width of the entire length there are 8 drilled holes

Material:

Aluminum alloy astmb221 grade 6063-t6 or grade 6061-t651 or astmb209 grade 6061-i651

Material:

Aluminum alloy astmb221 grade 6063-t6 or grade 6061-t651 or astmb209 grade 6061-i651

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
