Fabrication Method:

Hot rolled

Width:

36.000 inches

Length:

6.000 feet

Cross-sectional Thickness:

2.0000 inches

Basic Shape Style:

Solid

Edge Type:

Sheared

Weight Per Unit Measure:

81.600 pounds per square foot

Min. Tensile Strength (psi):

90000 pounds per square inch

Minimum Yield Strength:

70000 pounds per square inch

Special Features:

Steel, ams 6350 alloy 4130

Heat Treatment:

Annealed

Material:

Steel

Material:

Steel

Surface Condition:

Descaled

Specification Or Standard:

A condition

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
