Fabrication Method:
Hot rolled
Length:
20.000 feet
Cross-sectional Thickness:
0.1250 inches
Basic Shape Style:
Solid
Edge Type:
Sheared
Weight Per Unit Measure:
0.850 pounds per square foot
Min. Tensile Strength (psi):
55000 pounds per square inch
Minimum Yield Strength:
40000 pounds per square inch
Special Features:
Width: 2.250 inches wide; material: astm a1011, structural steel grade 40; basic shape style: square.
Heat Treatment:
As fabricated
Material:
Steel, astm a570
Material:
Steel
Surface Condition:
Pickled
Specification Or Standard:
Ss-40 grade
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A13100
