Fabrication Method:

Cold finish

Width:

48.000 inches

Length:

10.000 feet

Cross-sectional Thickness:

0.1250 inches

Basic Shape Style:

Solid

Min. Tensile Strength (psi):

70000 pounds per square inch

Minimum Yield Strength:

25000 pounds per square inch

Material:

Steel, astm a240, class 316l

Material:

Steel, astm a240, class 316l

Surface Condition:

Dull

Specification Data:

91346-astm a167 professional/industrial association standard

Specification Or Standard:

316l class and 2d finish

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
