Fabrication Method:

Hot rolled

Width:

27.500 inches

Length:

9.000 feet

Cross-sectional Thickness:

0.0247 inches

Center To Center Distance Between Corrugations:

2.666 inches

Corrugation Depth:

0.500 inches

Basic Shape Style:

Solid

Edge Type:

Sheared

Corrugated Edge Direction:

Opposite direction

Weight Per Unit Measure:

1.113 pounds per square foot

Coating Weight:

1.250 ounces per square foot

Heat Treatment:

As fabricated

Material:

Steel, a929

Material:

Steel, a929

Surface Treatment:

Zinc

Surface Treatment:

Ordinary zinc coating (commercial)

Specification Or Standard:

Class d, type ii is corrugated with ordinary zinc coating-commercial

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A13100
