Fabrication Method:

Cold rolled

Width:

4.000 inches

Length:

Any acceptable

Cross-sectional Thickness:

0.1880 inches

Cross-sectional Width:

4.000 inches

Basic Shape Style:

Solid

Edge Type:

No. 1 beveled or no. 1 round or no. 1 square or no. 2 or no. 3 or no. 4 or no. 5 or no. 6

Weight Per Unit Measure:

2.550 pounds per linear foot

Min. Tensile Strength (psi):

Not rated

Minimum Yield Strength:

Not rated

Heat Treatment:

Hard or half hard or quarter hard

Material:

Steel, qq-s-698, comp 1010 and steel, qq-s-698, comp 1015

Material:

Steel comp 1010 and steel

Material Specification:

Qq-s-698, comp 1010 federal specification 1st material response and qq-s-698, comp 1015 federal specification 2nd material response

Surface Condition:

Dull

Specification Or Standard:

1 temper and 2 temper and 3 temper and no. 1 finish

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
