Fabrication Method:

Hot rolled

Width:

36.000 inches

Length:

8.000 feet

Cross-sectional Thickness:

0.3125 inches

Basic Shape Style:

Solid

Edge Type:

Any acceptable

Min. Tensile Strength (psi):

75000 pounds per square inch

Minimum Yield Strength:

30000 pounds per square inch

Material:

Steel, astm a666, class 302

Material:

Steel, astm a666, class 302

Surface Condition:

Pickled

Specification Or Standard:

302 class and 1 finish

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
