Fabrication Method:

Hot rolled

Width:

2.000 inches

Length:

8.333 feet

Cross-sectional Thickness:

0.0610 inches

Cross-sectional Width:

2.000 inches

Basic Shape Style:

Solid

Weight Per Unit Measure:

0.422 pounds per linear foot

Min. Tensile Strength (psi):

Not rated

Minimum Yield Strength:

Not rated

Special Features:

Rockwell hardness c48 to c51

Heat Treatment:

Spring temper

Material:

Steel, .90 to 1.05 pct. Carbon

Material:

Steel, .90 to 1.05 pct. Carbon

Surface Condition:

Polished

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A13100
