Fabrication Method:

Hot rolled

Width:

96.000 inches

Length:

10.000 feet

Cross-sectional Thickness:

1.5000 inches

Basic Shape Style:

Solid

Min. Tensile Strength (psi):

58 pounds per square inch

Minimum Yield Strength:

36 pounds per square inch

Special Features:

Tensile strength ksi 80 max.

Material:

Steel, astm a36

Material:

Steel uns k02600

Material Specification:

Astm a36 assn standard 1st material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A13100
