**Fabrication Method:**

Cold rolled

**Width:**

36.000 inches

**Length:**

120.000 inches

**Cross-sectional Thickness:**

0.0400 inches

**Basic Shape Style:**

Solid

**Special Features:**

Corrosion resistant; heat treated; free of intergranular corrosion resulting from precipitated carbides; intended for structural applications where welding is limited to spot welding or similar methods where corrosion resistance of welds is not a prime concern

**Material:**

Stainless steel 304

**Material:**

Stainless steel 304

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A13100
