Fabrication Method:

Cold rolled

Width:

36.000 inches

Length:

120.000 inches

Cross-sectional Thickness:

0.0400 inches

Basic Shape Style:

Solid

Special Features:

Corrosion resistant; heat treated; free of intergranular corrosion resulting from precipitated carbides; intended for structural applications where welding is limited to spot welding or similar methods where corrosion resistance of welds is not a prime concern

Material:

Stainless steel 304

Material:

Stainless steel 304

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A13100
