Metal Plate - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/9515-01-352-1708

Fabrication Method:

Hot rolled

Width:

48.000 inches

Length:

120.000 inches

Cross-sectional Thickness:

6.0000 inches

Minimum Yield Strength:

360000 pounds per square inch

Special Features:

Heat treated; tensile strength ksi: 55-80; for use in riveted, bolted or weided construction of bridges or buildings

Material:

Carbon steel, astm-a-36

Material:

Carbon steel, astm-a-36

Shelf Life:

N/a

Unit Of Measure:

Demilitarization:

No

Fiig:

A13100
