**Fabrication Method:**

Hot rolled

**Width:**

48.000 inches

**Length:**

120.000 inches

**Cross-sectional Thickness:**

1.7500 inches

**Basic Shape Style:**

Solid

**Min. Tensile Strength (psi):**

58 pounds per square inch

**Minimum Yield Strength:**

36 pounds per square inch

**Special Features:**

Corrosion resistant; heat treated

**Material:**

Steel, astm a36

**Material:**

Steel uns k02600

**Material Specification:**

Astm a36 assn standard 1st material response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A13100
