Fabrication Method:

Hot rolled

Width:

48.000 inches

Length:

120.000 inches

Cross-sectional Thickness:

1.7500 inches

Basic Shape Style:

Solid

Min. Tensile Strength (psi):

58 pounds per square inch

Minimum Yield Strength:

36 pounds per square inch

Special Features:

Corrosion resistant; heat treated

Material:

Steel, astm a36

Material:

Steel uns k02600

Material Specification:

Astm a36 assn standard 1st material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A13100
