Fabrication Method:

Wrought

Width:

38.000 inches

Length:

42.870 inches

Cross-sectional Thickness:

0.6250 inches

Basic Shape Style:

Solid

Physical Form:

Coil

Min. Tensile Strength (psi):

130000 pounds per square inch

Minimum Yield Strength:

120000 pounds per square inch

Special Features:

Item is a plate, armor, turret fabricated from armor

Material:

Titanium alloy, 21677-07, caged 11871

Material:

Titanium alloy, 21677-07, caged 11871

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A13100
