Fabrication Method:

Hot rolled

Width:

2438.0 millimeters

Length:

4876.8 millimeters

Cross-sectional Thickness:

25.0 millimeters

Basic Shape Style:

Solid

Min. Tensile Strength (psi):

795 megapascals

Minimum Yield Strength:

690 megapascals

Special Features:

Carbon equivalent to 0.46 percent max; charpy category 5 (greater than or equal to) guaranteed impact, 40 joules at minus 40.0 degrees centigrade

Material:

Steel, astm a517

Material:

Steel, astm a517

Surface Treatment:

Primer

Surface Treatment:

Paint, primer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
