**Fabrication Method:**

Hot rolled

**Width:**

2438.0 millimeters

**Length:**

4876.8 millimeters

**Cross-sectional Thickness:**

25.0 millimeters

**Basic Shape Style:**

Solid

**Min. Tensile Strength (psi):**

795 megapascals

**Minimum Yield Strength:**

690 megapascals

**Special Features:**

Carbon equivalent to 0.46 percent max; charpy category 5 (greater than or equal to) guaranteed impact, 40 joules at minus 40.0 degrees centigrade

**Material:**

Steel, astm a517

**Material:**

Steel, astm a517

**Surface Treatment:**

Primer

**Surface Treatment:**

Paint, primer

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A13100
