NSN 9530-00-194-8660

Metal Bar - Page 1 of 1

Fabrication Method:

Any acceptable

Length:

1.083 feet

Cross Section Inside Diameter:

0.750 inches

Cross Section Outside Diameter:

2.000 inches

Basic Shape Style:

Round w/ core

Material:

Copper alloy 836

Material Specification:

Qq-c-390, alloy 836 federal specification 1st material response

Specification Or Standard:

B5 composition and 1 type or 2 type and as condition

Shelf Life:

N/a

Unit Of Measure:

Demilitarization:

No

Fiig:

A13100
