Fabrication Method:
Cold drawn
Length:
Between 6.000 feet and 20.000 feet
Basic Shape Style:
Hexagon
Cross-sectional Width Across Flats:
0.625 inches
Weight Per Unit Measure:
1.300 pounds per linear foot
Heat Treatment:
Stress relieved
Material:

Material:

Nickel alloy 400

Material Specification:

Nickel, qq-n-281, class a

Qq-n-281, class a federal specification 1st material response

Specification Or Standard:

A class and 1, bar form and cold drawn condition

Shelf Life:

N/a

Unit Of Measure:

Demilitarization:

No

Fiig:

A13100
