Fabrication Method:

Centrifugal cast

Length:

1.000 feet

Cross Section Inside Diameter:

0.750 inches

Cross Section Outside Diameter:

1.500 inches

Basic Shape Style:

Round w/ core

Weight Per Unit Measure:

4.840 pounds per linear foot

Heat Treatment:

As cast

Material:

Copper alloy, qq-c-390, alloy g1

Material:

Copper alloy 955

Material Specification:

Qq-c-390, alloy g1 federal specification 1st material response

Specification Or Standard:

G1 alloy and 2 type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A13100
