Fabrication Method:

Drawn and rolled

Length:

12.000 feet

Cross-sectional Thickness:

1.5000 inches

Cross-sectional Width:

2.000 inches

Basic Shape Style:

Flat

Usage Design:

Aircraft

Heat Treatment:

Annealed

Material:

Titanium alloy, mil-t-9047, comp a-1 (6al-4v)

Material:

Titanium alloy, mil-t-9047, comp a-1 (6al-4v)

Surface Condition:

Descaled

Specification Data:

81349-mil-t-9047 government specification

Specification Or Standard:

Composition a-1 and condition annealed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100

Mil-std (military Standard):

Mil-t-9047 spec.
