Fabrication Method:

Extruded and drawn

Length:

Between 2.000 feet and 6.000 feet

Cross Section Outside Diameter:

3.000 inches

Basic Shape Style:

Round

Special Features:

Temper unyielded

Heat Treatment:

Quench hardened and stress relieved

Material:

Nickel-aluminum-bronze, astm b150, alloy 632

Material:

Nickel-aluminum-bronze, astm b150, alloy 632

Specification Or Standard:

Uns c63200 and temper tq55

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A13100
