Fabrication Method:

Extruded

Length:

12.000 feet

Cross-sectional Thickness:

0.2500 inches

Cross-sectional Width:

1.120 inches

Basic Shape Style:

Flat

Special Features:

Cross sectional view shows a radius on left bottom corner 0.250 in.

Heat Treatment:

T-73511 solution heat treated

Material:

Aluminum alloy ams-qq-a-200/11, alloy 7075

Material:

Aluminum alloy ams-qq-a-200/11, alloy 7075

Specification Or Standard:

Alloy 7075 and temper t73511

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
