Fabrication Method:
Rolled
Length:
102.000 inches
Cross-sectional Thickness:
0.500 inches
Cross-sectional Width:
5.000 inches
Basic Shape Style:
Flat
Usage Design:
Aircraft
Special Features:
Material covered by this specification is intended for use in the fabrication of airframe parts requiring up to 750 degrees f and oxidation
resistance up to 1000 degrees faranheit
Heat Treatment:
Annealed
Material:
Titanium, mil-t-9046, type 3, comp e
Material:
Titanium, mil-t-9046, type 3, comp e
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A13100
