Fabrication Method:

Rolled

Width:

36.000 inches

Length:

13.000 feet

Cross-sectional Thickness:

0.0200 inches

Basic Shape Style:

Solid

Physical Form:

Flat stock

Edge Type:

Sheared

Cladding Thickness:

0.0010 inches both sides

Weight Per Unit Measure:

0.288 pounds per square foot

Heat Treatment:

O-annealed

Material:

Aluminum alloy, ams-qq-a-250/5, alloy 2024 (alclad)

Material:

Aluminum alloy 2024

Material Specification:

Ams-qq-a-250/5 assn standard single material response

Specification Or Standard:

Alloy 2024 (alclad) and condition annealed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A13100
